

## **Pre-Trip Training for CDL License**

There are two reasons you, as an owner/manager of a trucking company should be interested in this course: reduced costs and better pass rates. How much does it cost you if your driver and truck become shut down because an inspector finds faulty equipment during a random D.O.T. inspection? This can be avoided if your drivers understand the proper techniques of pre-trip inspection. What's more, they can identify maintenance issues before they become a beside-the-road breakdowns.

Most candidates find the Pre-Trip Inspection portion of the CDL State Examination the most difficult. In this one day course you will learn and demonstrate the correct procedures for conducting a pre-trip inspection on commercial motor vehicles.

On the inspection test, a candidate must get 80% of the items correct. Included in this one-day course:

Terminology required by the CDL Manual

Identification of parts of a truck: suspension systems, steering systems, braking systems, etc.

Proper inspection sequence to ensure complete inspection

A real-world, hands-on approach to passing the examination

A sample inspection checklist to be used while inspecting

Our instructor, Stanley Williams, is recognized by other commercial driving programs across the state as one of the premier instructors in Pre-Trip Inspection. His students enjoy a higher-than-average pass rate. He is thorough and knowledgeable.
