**Bainbridge College  
Associate Degree of Nursing**

Welcome to the Bainbridge College Associate Degree Nursing Program. We are pleased that you are ready to begin or continue your preparation for your Associate Degree Nursing (ADN) career at Bainbridge College.

This is a challenging time for the nursing profession. Providing quality health care is becoming increasingly more complex, and the system of health care delivery is changing daily. The nursing shortage has resulted in exciting new opportunities for the nursing profession. There are a variety of new options and career choices emerging.

The Associate Degree Nursing Program requires students to maintain a high level of motivation, energy, good health, good study habits and organizational skills in order to be successful. Please read this booklet carefully and feel free to ask questions. It is the student's responsibility to know what is contained in this handbook.

This handbook is intended to be utilized in addition to, not in lieu of, the Bainbridge College Catalog and the Bainbridge College Student Handbook.

This student handbook presents information about the Associate Degree of Nursing program. The handbook is kept as accurate as possible, but the information may not remain current for all of the academic year. Changes in courses, course content, credit, fees, regulations, semester calendar, curriculum, and other college matters may be changed in accordance with established college procedures and without prior notice. Such changes authorized by Bainbridge College apply both to prospective students and to those previously enrolled, unless the latter are specifically exempted.

Please feel free to ask any of the faculty for assistance.

### **DIVISION OF NURSING: FACULTY**

The Nursing faculty is committed to providing the best possible preparation for entry into the nursing profession. Faculty members are educated in their specialty areas as well as in methods of teaching and learning. Teaching methods utilized in this program may be very different from those to which you are accustomed. The teaching methods utilized have been selected to maximize the students' learning experiences and prepare them for nursing in the "real world." Please pay close attention to your learning style and capitalize on it.

Part-time faculty assist full-time faculty in clinical teaching so that faculty-student ratios can be kept at the optimal level as mandated by the Georgia Board of Nursing. Both full-time and part-time faculty serves as clinical instructors. Each faculty member holds a current license in the State of Georgia as a Registered Professional Nurse. The faculty will assist you with skills acquisition in the Nursing Laboratory.

7/15/09

## **Philosophy**

The philosophy of BC's ADN program was formulated by faculty as a guide to develop the curriculum and has been revised since the program was initially developed in 2004 -2006. The philosophy incorporates beliefs about man (client), the environment, health, nursing as a profession in the roles of provider of care, manager of care and member within the discipline of nursing, student body diversity, faculty-student relationships and associate degree nursing education.

The conceptual framework represents faculty values, essential competencies from the National League for Nursing's (NLN) "*Education Outcomes of Associate Degree Nursing Programs: Roles and Competencies*" (2000), and the American Nurse's Association (ANA) "*Scope & Standards of Practice*" (2004). The core competencies for health care professionals found in *Health Professions Education* (Institute of Medicine, 2003) and expounded on for nurses in the ANA "*Teaching IOM: Implications of the Institute of Medicine Reports for Nursing Education*" (2007) were also used as a guide for the revised curriculum.

The philosophy of the ADN program is congruent with BC's a) commitment to excellence and responsiveness to the local area, b) commitment to a teaching/learning environment that sustains educational excellence, c) commitment to providing educational opportunities and access for a diverse student body in the University System and d) commitment to provide associate degree programs that prepare students wishing to pursue higher levels of learning. The faculty believes that nursing is both an art and a science. It is a profession guided by scientific principles, nursing research, knowledge acquired from natural and social sciences, caring concepts and the nursing code of ethics.

7/15/09

The faculty believes essential competencies for the practice of associate degree nursing are a) professional behaviors, b) communication, c) assessment, d) clinical decision making, e) caring interventions, f) teaching/ learning, g) collaboration and h) provider and manager of care.

We believe that man (client) is a distinct individual, with inherent value and dignity. The client gradually changes and develops in regular, predictable patterns as he interacts within the environment to meet physiological and psychosocial needs.

The faculty believes that health is dynamic. Health is affected by internal and external phenomena. Homeostasis of these phenomena indicates wellness. Nursing strives to assist clients in maintaining homeostasis.

The faculty believes that associate degree nursing education facilitates evolution of students' intellectual, physical, moral and spiritual capabilities and ideologies. Students actively participate, cooperate, collaborate and interact with professors, peers and other disciplines as they become providers and managers of care and members within the discipline of nursing. Previous life experiences and knowledge affect acquisition of new learning. Associate degree nursing education and practice enhances growth as a professional nurse by providing a caring faculty/ student environment, encouraging an interactive exchange of ideas while using a variety of teaching strategies, providing diverse clinical experiences and fostering self learning, self reflection and continuing education.

The faculty believes that diversity enriches the student body and we are committed to working with students in a non discriminatory learning environment. Diversity not only encompasses race, ethnicity, and culture but may also include age, gender, religion, socioeconomic status, family composition and lifestyle choices. The life experience each student brings to the classroom enhances cultural knowledge and development among the student body. In addition, the BC ADN program desires to produce graduate nurses who reflect the diversity of the local community and who are able to function in a global society.

7/15/09

The ADN faculty is committed to excellence and responsiveness to the local and global healthcare needs. We believe that the ADN faculty are accountable for the educational process and are charged with preparing the novice, professional nurse, to competently and confidently function within a dynamic healthcare environment. We also believe that learning is a lifelong process and desire to foster a commitment to institutional and self improvement.

The organizing framework, terminal learning outcomes, definition of terms and chart presenting the flow of the organizing framework from the philosophy into the course outcomes and terminal expectations are found on the following tables and pages.

## **TERMINAL LEARNING OUTCOMES OF THE CURRICULUM**

The graduates of the Associate Degree Nursing program should be able to:

1. Provide and manage the care of clients utilizing the nursing process and supported by evidence based practice resulting in safe and competent client care.
2. Incorporate caring interventions into all aspects of client care.
3. Demonstrate critical thinking and problem solving skills in the management and delegation of client care.
4. Integrate ethical and legal concepts in providing client care.
5. Display initiative for personal growth and commitment as a professional within the discipline of nursing.
6. Employ therapeutic communication skills with clients and other healthcare team members while effectively utilizing various forms of advanced technology in the healthcare setting.
7. Provide culturally sensitive care to a diverse population.
8. Collaborate with peers and other members of a multidisciplinary health care team to coordinate quality client care.
9. Apply principles of teaching/ learning to identify learning needs and promote appropriate teaching strategies among diverse populations.
10. Utilize proficient assessment skills to accurately appraise client condition to provide safe, competent, holistic care.

## **Client**

The faculty believes that individuals are a sum of intricate parts that consist of physical, emotional, cognitive, ethnic, cultural, spiritual and creative elements that continually interact with the environment to meet physiological and psychosocial needs. Individuals are holistic in nature, having an inseparable body, mind and spirit possessing intrinsic worth and human dignity. Individuals are autonomous and therefore, capable of and responsible for making decisions. A client may be an individual, family or group.

## **Environment**

An individual's environment consists of internal and external phenomenon which affects their response to various degrees of health and wellness. The internal environment; consisting of physical, emotional, cognitive, ethnic, cultural and spiritual elements influence the individual's perception of health and the context of the experience. The external environment, including other individuals, families, groups, communities, circumstances and physical conditions surrounding the client can have a positive or negative effect regarding health and wellness as a whole.

## **Health**

Health is a dynamic state of functioning involving the integration of internal and external phenomena where wellness involves homeostasis of these phenomena and illness indicates an alteration.

## **Associate Degree Nursing Education**

ADN education prepares the graduate to function in the role of a registered nurse as outlined by the NLN (2000): a) provider of care, b) manager of care and c) member within the discipline. ADN education at BC prepares the graduate to provide evidence-based, holistic, client-centered nursing care to a diverse population in a variety of settings. Students develop competency and confidence in client assessment, clinical decision making skills and use of advanced technology. Knowledge of teaching and learning principles are acquired and integrated

7/15/09

into all aspects of care. Caring behaviors are developed and role-modeled throughout the ADN program.

Associate degree nursing education at BC prepares graduates with the ability to organize care, delegate appropriate aspects of care, as well as communicate, collaborate and coordinate client care with other healthcare providers. Associate degree nursing education at BC facilitates the graduate's personal sense of accountability and conscience by preparing the nurse to function in a legal and ethical framework within the profession. Recognizing political, economical and societal forces which influence the practice of nursing, graduates are equipped to assume responsibility for continuous quality improvement in the workplace, participate in public service through local, state, and national organizations and develop their own personal and professional growth, including a commitment to lifelong learning.

### **Nursing Practice**

Nursing practice today encompasses the following critical elements in client-centered care: a) evidence-based interventions, b) client safety c) competent and quality care, d) holistic practice and e) cultural sensitivity. These elements are essential components of nursing practice in the ever changing health care environment.

Critical thinking skills, the ability to communicate and collaborate effectively in an interdisciplinary manner, and knowledge of informatics and fiscal accountability are essential characteristics of the registered nurse today. In addition, the qualities of confidence and conscience are desirable and valued nursing traits.

### **Professional Behavior**

Professional nursing behavior and practice of the individual nurse are crucial to the provision of client-centered care and the advancement of nursing as a profession.

A registered nurse must be competent in critical thinking and decision making abilities, possess leadership and management skills, and effectively delegate and supervise other health care providers. Through an interdisciplinary approach, the registered nurse partners with other

7/15/09

healthcare workers to communicate and collaborate as client advocates. The associate degree nursing graduate employs legal and ethical nursing behaviors in the provision of client care protecting clients' autonomy, dignity, privacy and confidentiality. Caring and culturally sensitive behaviors are essential. The professional nurse demonstrates accountability for safe, quality nursing care by following standards of practice of the profession and by participating in life long learning and professional development.

### **Competence**

Competence is the capability of providing safe and effective care utilizing learned knowledge, skills and abilities progressing from simple to complex.

### **Caring**

Caring is an essential component of nursing that involves competent, nurturing and compassionate behaviors. Caring promotes an environment of trust and acceptance, where the clients' beliefs, cultural values and life choices are respected. A caring nurse/client relationship fosters personal, social, moral and spiritual engagement for both the nurse and client alike.

### **Conscience**

Conscience is concerned with a person's inner sense of right and wrong, moral goodness, justice and fairness. The ANA Code of Ethics for Nurses (2001) asserts those characteristics expected of professional nurses: a) respect for human dignity, b) a primary commitment to the client, c) promotion and advocacy for the client's rights concerning privacy, confidentiality and safety, d) accountability and responsibility for nursing judgment and action, e) preservation of personal and professional growth involving moral self-respect, maintenance of competence, character, and integrity and f) the ability to determine and implement acceptable standards of clinical nursing practice including developing evidence-based knowledge.

### **Commitment**

The faculty believes commitment is five-fold: to the client, to the partnering or employing facility or organization, to nursing, to the public, or society, as a whole; and to self. Commitment involves pledging client advocacy, respect and caring as well as the provision of evidence-based, safe, quality, holistic, competent and accountable care. Communicating effectively and efficiently with others through oral, written or electronic methods and maintaining policies and procedures according to the organization indicates commitment to the facilities utilized. The profession of nursing is enhanced when professional behaviors are demonstrated including use of evidence-based practice to uphold and improve the standards of care for clients. Public service, in the form of health screenings, participation in local health fairs, immunization clinics, activity days for children, booths for the American Cancer Society and general participation in local, state, and nationwide nursing organizations increases the scope of influence for BC, the ADN program, students and nursing, and improves the knowledge and quality of life for those served. Commitment to self involves caring for oneself physically, emotionally and mentally and striving to maintain academic knowledge and scholarship for a lifetime of learning.

### **Communication**

Communication is a process where the nursing student/graduate professionally and effectively engages in verbal, nonverbal, written and electronic exchange of information with clients, peers, faculty and members of the interdisciplinary health care team.

### **Collaboration**

Collaboration involves assuming an advocate role in coordination of client care with members of a multidisciplinary healthcare team in a variety of health care settings. The emphasis is on promoting positive client outcomes through a joint interdisciplinary partnership.

### **Assessment**

Assessment is utilized as the initial step in the nursing process. The nursing process consists of five interlinking parts: a) assessment, b) diagnosis, c) planning, d) implementation

7/15/09

and e) evaluation. Proficient assessment skills involve accurate appraisal of the client condition that encompasses all the domains of an individual's need to receive safe, competent and holistic care.

### **Clinical Decision Making**

Clinical decision making requires utilization of the nursing process and synthesis of knowledge, allowing true analysis to take place. This crucial process also incorporates a solid base of critical thinking skills, prioritization proficiency and utilization of evidence-based practice guidelines that results in safe, effective, clinical decision making.

### **Teaching/ Learning**

Teaching/ learning involves assessing a client's perception of health and readiness to learn and then utilizing a variety of instructional strategies to promote learning and wellness. The nursing student/graduate performs assessments and selects appropriate teaching strategies for a client, group of clients or assistive personnel, as learning needs are identified.

### **Provider and Manager of Care**

The nursing student/graduate provides safe, quality, holistic, culturally sensitive and competent care while utilizing the nursing process to assess, prioritize, evaluate and delegate care in a wide variety of settings. As manager of care, the graduate will have the beginning knowledge and ability to manage resources efficiently, be flexible and adaptable to technological changes, collaborate with other healthcare providers, apply quality improvement measures, demonstrate advocacy and respect for clients and members of the healthcare team and possess conscience and wisdom to seek assistance when and if needed.

Table 1 – Relationship of Bainbridge College Mission Statement, ADN program mission statement and ADN Philosophy

Mission – Bainbridge College	Mission – ADN Program	Philosophy – ADN Program
<p>Bainbridge College shares with the other two-year colleges in the University System of Georgia the following core characteristics or <i>purposes</i>:</p> <ul style="list-style-type: none"> <li>-a commitment to excellence and responsiveness within a scope of influence defined by the needs of a local area and by particularly outstanding programs or distinctive characteristics that have a magnet effect throughout the region or state</li> <li>-a commitment to a teaching/learning environment, both inside and outside the classroom, that sustains instructional excellence, functions to provide University System access for a diverse student body and promotes high levels of student learning.</li> <li>-a high quality general education program that supports a variety of well-chosen associate programs and prepares student for transfer to baccalaureate programs, learning support programs designed to ensure access and opportunity for a diverse student body, and a limited number of certificate or other career programs to complement neighboring technical institute programs.</li> <li>- a commitment to public service, continuing education, technical assistance, and economic development activities that address the needs, improve the quality of life and raise the educational level within the college’s scope of influence</li> <li>-a commitment to scholarship and creative work to enhance instructional effectiveness and to meet local needs.</li> </ul>	<p>It is the mission of the Bainbridge College Associate Degree in Nursing Program:</p> <ul style="list-style-type: none"> <li>To offer a high quality program to respond to the nursing shortage in acute and long-term care in southwest Georgia and surrounding areas.</li> <li>To offer a teaching learning environment which (a) promotes personal and professional responsibility and accountability, (b) includes caring, holistic beliefs and critical thinking as essential components of nursing</li> <li>To offer a high quality program to prepare graduates to practice competent, culturally sensitive care as a registered nurses providing direct client care to a diverse population.</li> <li>To offer a teaching learning environment which (c) prepares graduates for life-long learning including baccalaureate and advanced degrees in nursing.</li> </ul>	<p>The faculty in nursing believes and supports the mission of Bainbridge college in general and specifically:</p> <ul style="list-style-type: none"> <li>A commitment to excellence and responsiveness...defined by needs of a local area</li> <li>A commitment to teaching/learning environment...that sustains educational excellence. ..provide caring faculty/ student environment...</li> <li>...prepare the novice professional nurse to competently function within a dynamic healthcare environment... encourages interactive exchange of ideas using a variety of teaching strategies...provide diverse clinical experiences...</li> <li>... foster self learning, self reflection and continuing education..</li> <li>We believe that caring is a process of helping others grow....students continue to care when they experience care from others....caring is best experience in an educational setting characterized by support, trust, honesty, and patience...caring includes the identification and maintenance of standards of excellence.</li> </ul>

# NURSING PROGRAM POLICIES

## ACADEMIC REQUIREMENTS

Admission and progression requirements for the Associate Degree Nursing (ADN) student at Bainbridge College are specified in the college catalog. A copy of the catalog may be obtained in the Admissions Office, the Technical Studies Division, or from your advisor. Also the catalog may be viewed at the Bainbridge College website: <http://www.bainbridge.edu>. It is the student's responsibility to be aware of and to meet all of the requirements for progression and graduation from the Associate Degree Nursing program at Bainbridge College. **In addition, the student must meet with a nursing advisor at least once each semester and as necessary to ensure that he/she is progressing appropriately.** All questions regarding admission/progression and graduation requirements should be directed to an ADN nursing department advisor. The student applying for admission into the ADN Program will be required to meet the current admission and curriculum requirements in effect at the time of admission. Applicants who are accepted for admission to the nursing program, but do not enter the next admitting semester, must reapply for admission into the next class and meet all requirements for admission.

Important Note to Applicants: Admission to the ADN program is a competitive process. Completion of the requirements below only places in you in the pool of eligible candidates and does not guarantee admission. Applicants with the strongest academic credentials will have priority.

### **Admission Standards for Associate Degree in Nursing**

Minimum admission standards for the program include:

1. Complete the application process for admission to Bainbridge College
2. Any student who provides false information on the Nursing Program application will be excluded from admission or if accepted into the ADN program will be terminated.
3. Must not have failed two nursing courses within the last 5 yrs at any nursing school
4. Have completed successfully all developmental classes for degree level programs.
  - Have earned a minimum grade point average of 2.5 on required core courses for the ADN program. If any core class is taken more than once, the two grades will be averaged.

4. Human Anatomy and Physiology and Microbiology courses must have taken within five (5) years of ADN Program entry date.
5. **Students must have completed the following core classes with a C or higher prior to applying to the ADN Program:**
  - BIOL 2111 – Human Anatomy & Physiology I
  - ENGL 1101 – English Composition I
  - PSYC 1101 – Introduction to General Psychology **or**
  - PSYC 2103 – Introduction to Human Development
  - CSCI 1000 – Computer Fundamentals
6. **Students may take the following classes in conjunction with the ADN Nursing Program prior to NURS 2050:**
  - BIOL 2112 – Human Anatomy & Physiology II
  - ENGL 1102 – English Composition II
  - BIOL 2115 – General Microbiology
  - COMM 1100 – Human Communication
  - HIST 2111 or HIST 2112 – United States History I or II
  - POLS 1101 – American Government
7. **Take the TEAS nursing entrance examination with satisfactory scores. The following scores must be achieved to meet criteria for possible admission:**
  - Reading – 65
  - English – 65
  - Math – 60
  - Science – 60
8. Have successfully completed The Regents' Reading Skills (RGTR 0198) and Regents' Writing Skills (RGTE 0199)
9. All core classes must be completed prior to entering the final semester, NURS 2050, Advanced Nursing Concepts

**IF ACCEPTED INTO THE ADN PROGRAM, THE FOLLOWING REQUIRMENTS ARE DUE THE FIRST SEMESTER (Dates to be announced by faculty).** \*\*\* Please be advised that admission to the nursing program gives permission to send copies of health records to clinical facilities if required

- \_\_\_\_\_ Medical History/Physical Exam
- \_\_\_\_\_ Immunization Record/TB Skin Test or Chest X-Ray
- \_\_\_\_\_ Hepatitis B declination form if applicable
- \_\_\_\_\_ Drug Screen (Results to be sent to ADN Program Assistant)

- \_\_\_\_\_ Purchase of Liability Insurance. Must provide proof of purchase to ADN Program Assistant. This insurance must be renewed annually.
- \_\_\_\_\_ Purchase Health Insurance. Must provide proof of insurance to ADN Program Assistant. This insurance must be renewed every semester.
- \_\_\_\_\_ Take the American Heart Association Basic Life Support Certification course by and maintain the certification throughout the ADN program enrollment.
- \_\_\_\_\_ Criminal Background via Precheck

\*\*\* Must be able to provide own transportation to classes and clinicals (clinicals may be in Alabama, Florida, and other areas in Georgia)

## **ACADEMIC HONESTY POLICY**

The primary goal of education is to increase each student's own knowledge. Healthcare is an area in which comprehensive and accurate knowledge is vital for appropriate performance. Academic dishonesty, therefore, will not be tolerated in the Associate Degree Nursing Program at Bainbridge College. Possible consequences of academic dishonesty, depending on the seriousness of the offense, may range from a revision of assignment, an oral reprimand, a written reprimand, a zero for grade work, removal from the course with a grade of "F", removal from the ADN program and/or suspension or exclusion from Bainbridge College. Academic Dishonesty includes:

- Cheating on an examination
- Stealing course or examination materials
- **Plagiarizing or submission of another's ideas or papers (whether purchased, borrowed or otherwise obtained) as the student's own work**
- Falsifying records
- Knowingly and intentionally assisting another student in commission of any of the above

## **ATTENDANCE**

The policy of Bainbridge College Associate Degree in Nursing is that class, lab, and clinical attendance is essential to success in the nursing program. Students are expected to attend and be punctual to all of their scheduled classes, laboratories, and clinical sessions. The instructor should be notified of any absence or tardiness. The student is responsible for obtaining class notes and assignments from classmates. Although justified and unavoidable absences may occur, it is the responsibility of students to be aware of their own record of absences and to consult the instructor regarding work missed. The

decision to permit students to make up work is at the discretion of the instructor. Any allowed make-up work must be completed in the period directed by instructor. A student is expected to account for absences. At any time during the semester, the student may be dropped from the course and assigned a grade of “W”, “WF”, or “F” for excessive absences. Allowable absences include a jury summons, military duty, representation of the college in an official capacity, personal illness, immediate family severe illness, and death in the immediate family. In case of absence, **the student must call in at least 15 minutes prior to class/ lab/ clinical start time.** The student must call in each day of the absence period. If the student is absent when clinical pre-conference begins, without approved excuse, the student will receive a grade of unsatisfactory. If the student comes to clinical assignment ill, he/she will be sent from the clinical area and will be given a clinical absence. **A maximum of two absences from clinical, with all hours to be made up prior to the end of the semester, is allowed. Please note that laboratory experiences are considered clinical time.** If a student is absent more than three times from clinical for any reason, the student will be unable to complete the clinical requirements of the course and will receive a failing grade.

## **ATTENDANCE AT EXAMINATIONS**

If a student is to miss an exam, it is the responsibility of the student to notify the instructor in advance on the day of the exam. The student must request in person, via phone, or via e-mail within two days (not including exam day) to take a make-up exam. The type of make-up exam administered is at the instructor’s discretion. If the student fails to contact the instructor within the allotted time period, a zero will be awarded for the missed exam.

## **CHILDREN ON CAMPUS POLICY**

It is the goal of Bainbridge College to provide a safe and effective learning environment for all students. Any action that interferes with this goal will not be permitted. Therefore, bringing children to classroom or the clinical setting is not permissible.

## **DRESS DÉCOR**

In the classroom, students are expected to look clean and neat. Short shorts and tops showing cleavage are not acceptable. In the lab, the same as above. Tennis shoes are recommended.

## **CONFIDENTIALITY**

Health Insurance Portability and Accountability Act of 1996 (HIPAA) is a law that mandates patient confidentiality. This law is strictly enforced, and penalties are attached for non adherence. Compliance and adherence by Bainbridge College ADN Nursing students is mandatory.

1. Any and all personal client information will be on a “need to know” basis.
2. Any and all personal client information with which student is entrusted with will be maintained in a confidential manner at all times.
3. Any student discussion regarding clients, including procedures, diagnosis, symptoms, etc, will be limited to the learning environment (clinical conference, lab, or classroom).
4. Client names must never be utilized either in discussion or in written assignments.
5. Taping of class activities is not allowed in theory, clinical lab, or any clinical facility.
6. ADN students will respect the rights of others at all times. This includes colleagues, other students, college faculty and staff, facility staff, etc. This includes but is not limited to, information, discussions, computer or paper data.
7. Photocopying client records is prohibited. All computer generated records must be destroyed according to facility policy prior to the student leaving the clinical site. Any failure to comply with this policy will result in the student being dismissed from the ADN Nursing Program.

## **COMMUNICATION**

All students are required to maintain current and accessible phone numbers, mailing address, and e-mail address and to notify the ADN Department of any changes. Students are expected to log into GeorgiaView daily for current announcements/assignments.

## **COMPETENCY FOR DRUG CALCULATION**

The pharmacology content of the nursing curriculum will be introduced in the first nursing class, Foundations of Nursing (NURS 1010). The student will learn basics of pharmacology, including drug calculation and medication administration. As various specialty areas, body systems and disorders are taught, the student will gain more extensive information about drug classifications, indications and contraindications, administration, and side effects. Competency in drug calculation is critical in the nursing field. Therefore, the student is required to pass a drug calculation test with 100% accuracy in the following courses: NURS 1020, NURS 1025, NURS 2030, NURS 2040, and NURS 2050 each semester. The faculty will provide the student with three attempts prior to midterm to pass and provide tutorial prior to a second or third attempt. If the student is unable to pass the drug calculation quiz on three attempts, this will be deemed as a failure of the exam, and the student will be withdrawn from the course prior to midterm.

## **CONTINUATION AND PROGRESSION IN THE ADN PROGRAM**

Continuation in the nursing program requires a minimum of a C in all nursing courses and an earned satisfactory in clinical. **If students are taking core classes while in the nursing program they must be completed before the student enters NURS: 2050**

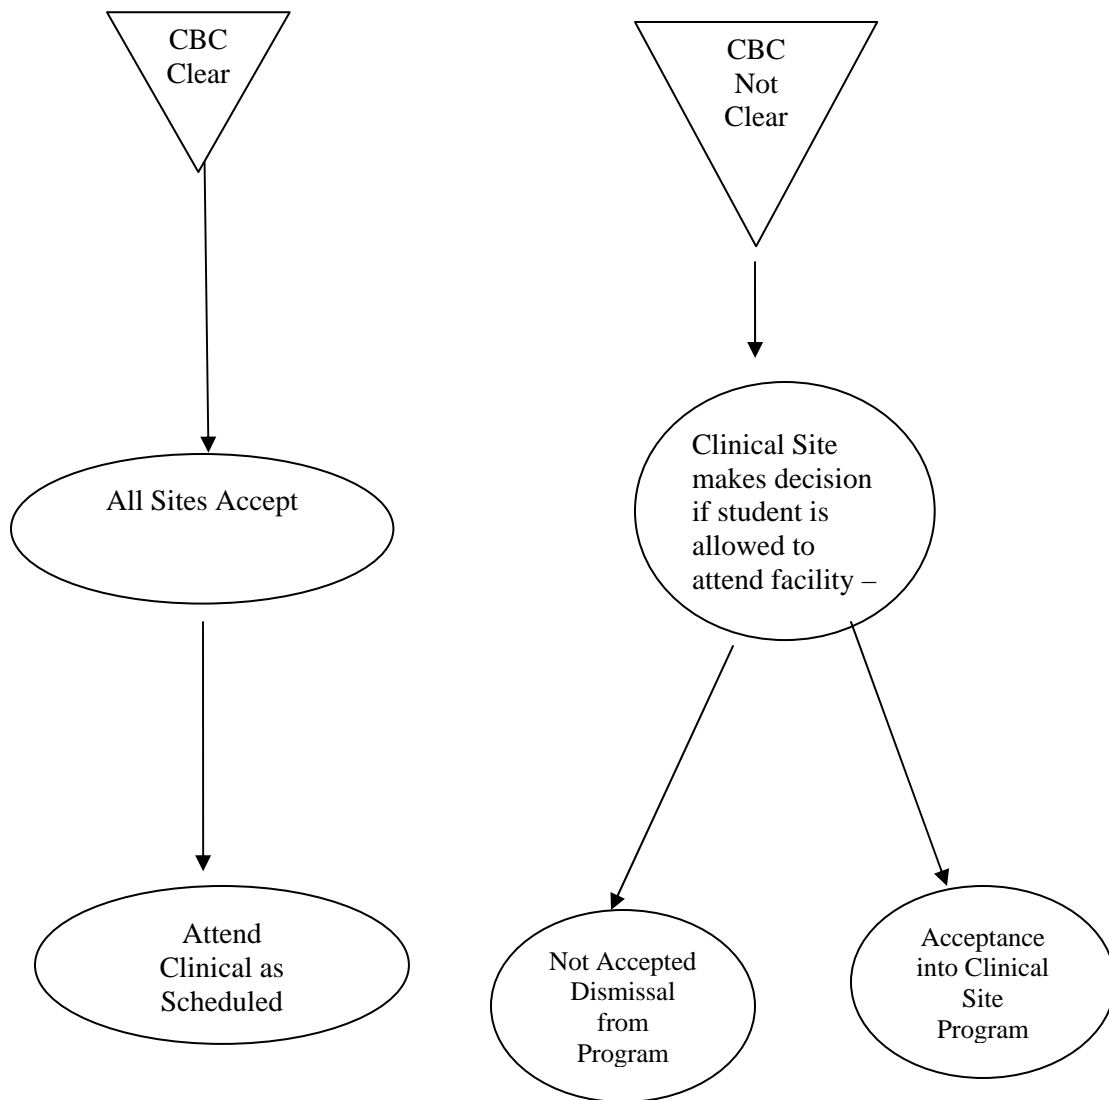

## **CRIMINAL BACKGROUND FOR CLINICAL EDUCATION**

### **Bainbridge College ADN Program**

The hospitals associated with our clinical education program require criminal background checks on incoming students to insure the safety of the clients treated by students in the program. Students are required to order a criminal background check in sufficient time for it to be reviewed by the health care facility prior to starting clinical rotations. A background check typically takes 3 normal business days to complete. It is the clinical agency who will determine if the student is able to attend clinical at the respective facility

The background checks are conducted by PreCheck, Inc., a firm specializing in background checks for healthcare workers. Your order must be placed online through Student Check. The student is responsible for the fee associated with the background check. The faculty will provide further instructions when and how the process is to be completed.

## CLINICAL SITE DETERMINATION OF CRIMINAL BACKGROUND SCREENING

### EMPLOYMENT

Unlicensed students shall be employed only as unlicensed nursing personnel. They shall not represent themselves, or practice, as nursing students except as part of a learning

activity in a practice setting. (e.g. An LPN who is in the ADN program must not perform any act as an LPN, only as a student.)

## **GRADING POLICY**

Grading for each course is described in each course syllabus. It is the responsibility of each student to be knowledgeable of the course requirements and grading methods.

Letter grades for the ADN Program are computed as follows:

A = 90 – 100  
B = 80 – 89  
C = 75 – 79  
D = 70-74.9  
F = below 74.9

**Grades are not rounded in the ADN program. For example a grade of 74.9 = 74**

## **STUDENT GRADE APPEALS POLICY:**

The Bainbridge College ADN Program shall maintain a written policy for students wishing to appeal grades. The purpose of this policy is to insure that clear directions are present regarding the grade appeal process.

### **PROCEDURE:**

1. The student first discusses the exam grade with the course coordinator/ faculty member who administered the grade of the nursing course.
2. If a resolution is not reached the student will present his or her concerns in writing to the Nursing Division Chair within 72 hours of receiving the assigned grade.
3. The Nursing Division Chair will conduct a review and will provide a written recommendation to the student and faculty member/course coordinator within 7 working days following receipt of the student's written appeal.
4. If the student is not satisfied with the response she/he can request review by the Vice President of Academic Affairs.

## **GRIEVANCE PROCEDURE**

For any situation of concern, the first step is discussion with the faculty member(s) involved. If the concern is not addressed to complete satisfaction, the Course Coordinator must be notified. If no resolution is obtained the next step is to make an appointment with the Nursing Division Chair. If resolution is still not achieved, the next step is to make an appointment with the Vice President of Academic Affairs. From here, the student will need to follow the grievance policy as stated in the college catalog.

## **HUMAN RIGHTS AND NONDISCRIMINATION**

Bainbridge College and the ADN program is committed to equal opportunity education. The college is guided in philosophy and practice by the principle that individuals shall not be treated differently because of race, creed, color, gender, age, disability, sexual orientation or national origin and that legitimate and reasonable access to facilities shall be available to all. This principle is particularly applicable in the admission of students to all programs of the college. It is also applicable in extracurricular activities, all student services, the employment of students by the college, and in the employment of faculty and non-instructional faculty.

Applicants or students who have any physical, emotional, or learning conditions that will require additional assistance to the student must submit a special needs form to the Office of Admissions. Upon receipt of this form, the Disabilities Service Provider will contact the student and discuss with them what specific documentation of their disability is required in order to receive services.

## **PROGRAM DISMISSAL**

A student may be dismissed from the Bainbridge College Nursing Program for:

- 1) Violation of the College Disciplinary Rules and Regulations (see Student Handbook)
- 2) Commission and/or conviction of a felony while enrolled in the program
- 3) Any infraction of the Georgia Nursing Practice Act or the Rules and Regulations Relating to Nursing in the State of Georgia, specifically:
  - a) Fraud or deceit - False representation of facts
  - b) Being found guilty of a felony, or of any offense that shall constitute a felony under the laws of the state
  - c) Negligence
    - i) Omission - failure to do something that the student has been taught to do
    - ii) Doing something, which a reasonable and prudent student would not do under the same or similar facts and circumstances in the practice of nursing
    - iii) An exercise of so slight a degree of care as to justify the belief that there was a conscious disregard or indifference for the health, safety, or welfare of the public shall be considered a substantial departure from the accepted standard of care.
  - iv) Habitually intemperate or addicted to habit-forming drug

- (1) Shall include but not be limited to the use of any drug, chemical, or substance, which could result in behavior that interferes with the responsibilities of the student.
- (2) Exhibiting actual or potential inability to practice as a nursing student with sufficient knowledge or reasonable skills and safety adherence to minimal (standards of acceptable nursing practice generally prevailing in the State of Georgia) due to impairment caused by illness, use of alcohol, drugs or any other substance, or as a result of any mental or physical condition
- 4) Being adjudicated as mentally incompetent, mentally ill, chemically dependent or dangerous to the public or being committed by a court of competent jurisdiction, within or without this state
- 5) Unprofessional conduct - nursing behavior (acts, knowledge, and practices) which fails to conform to the accepted standards of the nursing profession generally prevailing in the State of Georgia and which could jeopardize the health and welfare of the people which shall include but not be limited to the following:
  - a) inaccurate recording, falsifying or altering patient records
  - b) verbally or physically abusing patients
  - c) falsely manipulating drug supplies, narcotics, or patient records
  - d) appropriating without authority medications, supplies, or personal items of the patient or agency
  - e) falsifying documents submitted to the Board of Nursing
  - f) leaving a nursing assignment without properly advising appropriate personnel
  - g) violating the confidentiality of information or knowledge concerning the patient
  - h) conduct detrimental to the public interest
  - i) discriminating in the rendering of nursing services
  - j) impersonating any applicant or acting as proxy for the applicant in any examination required for the issuance of a license
  - k) impersonating another licensed practitioner
  - l) aiding, abetting, or assisting any other person to violate or circumvent any law or rule or regulation intended to guide the conduct of a nurse
  - m) forging a prescription for medication/drugs
  - n) knowingly presenting a forged prescription
  - o) selling or attempting to sell a controlled dangerous substance
  - p) otherwise making such drugs available without authority to self, friends, or family members
  - q) while caring for a patient, engaging in conduct with a patient that is sexual or may reasonably be interpreted as sexual, or in any verbal behavior that is seductive or sexually demeaning to a patient, or engaging in sexual exploitation of a patient
  - r) obtaining money, property, or services from a patient, other than reasonable fees for service provided to the patient, through the use of undue influence, harassment, duress, deception or fraud
  - s) engaging in fraudulent billing practices, including violations of federal Medicare and Medicaid laws or state medical assistance laws.
  - t) Any deliberate act that jeopardizes a patient's life, health, or safety

- i) delegating or accepting the delegation of a nursing function or a prescribed health care function when the delegation or acceptance could reasonably be expected to result in unsafe or ineffective patient care
  - ii) unauthorized alterations of medications
  - iii) failure to utilize appropriate judgment in administering safe nursing practice based upon the level of nursing for which the individual has been trained
  - iv) failure to exercise technical competence in carrying out nursing care
  - v) performing new nursing techniques or procedures without proper education and preparation
  - vi) failure to report through the proper channels the unsafe or illegal practice of any person who is providing nursing care
- 6) Individuals who are convicted of a felony and who do not comply with the terms of their parole and or probation while enrolled in the Nursing Program may be dismissed and will not be eligible for readmission

## **REGENTS' TESTING PROGRAM**

The Regents' Reading Skills (RGTR 0198) and Regents' Writing Skills (RGTE 0199) must be successfully completed prior to admission into the nursing program.

## **STANDARDIZED EXIT EXAM POLICY**

The Standardized Exit Exam is a comprehensive testing tool that evaluates how well the ADN student is prepared for the NCLEX-RN. The Standardized Exit Exam is a valid and reliable tool that will identify weaknesses and strengths of the students and the potential need for remediation prior to taking the licensure exam. Students who score the minimum requirement on the Standardized Exit Exam have a higher probability of failing NCLEX-RN.

All ADN students must successfully complete the Standardized Exit Exam while enrolled in Advanced Nursing Concepts. The Standardized exam may only be taken twice. Students who do not meet this scoring expectation must meet with a designated faculty member within two days from receiving a failing score and develop a remediation plan. A remediation plan must be implemented and completed at a date determined by the designated faculty member before retaking the Standardized Exit Exam.

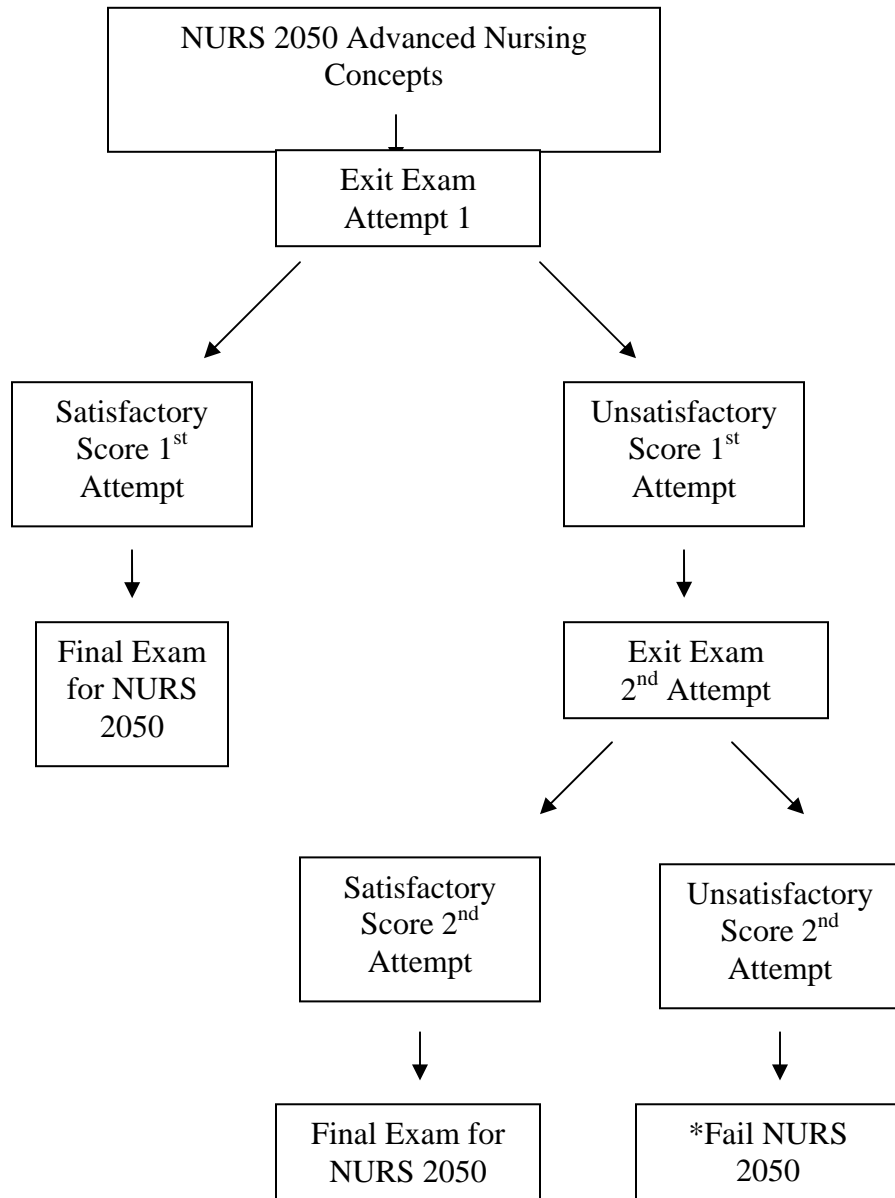

Those students who obtain the required score will have met the expectation of the Standardized Exit Exam policy and will be allowed to graduate, assuming all other course and program expectations are met.

### **Procedure:**

1. Associate Degree Nursing students will be informed of the Standardized exam and consequences of not passing. Please see the exit exam chart on the following page. Additionally, students will be educated on the correlation between Standardized Exam results and NCLEX-RN scores.

2. Those students who obtain the required score will have met the expectation of the Standardized Exit Exam policy and will be allowed to graduate, assuming all other course and program expectations are met
3. Students enrolled in NURS 2050 will be required to take the Standardized Exit Exam. Students who DO NOT meet the minimum scoring requirement must meet with a designated faculty member within two days of taking the Standardized Exit Exam.
4. Remediation shall include an instructor/student plan that maps out how the student will prepare for retaking the Standardized Exit Exam as well as a timeline for completion. The remediation plan must be in writing and signed by both student and designated instructor within an elected time period.
5. If a student is unable to meet the minimum expectation on the Standardized Exit Exam after two attempts, the student will not receive a passing grade in NURS 2050 and will not progress in the ADN Nursing program.
6. To appeal a Standardized Exit Exam score the student must contact in writing the Nursing Division Chair and the Vice President of Academic Affairs.

## EXIT EXAM CHART

\*.\* Student may repeat NURS 2050 one time only if no prior unsuccessful attempts of any NURS course exists. If this failure represents the second failure of any NURS course, then the student will lose eligibility to complete the ADN program and cannot return within three year

## **TAPING**

Taping of lectures is not permitted.

## **TARDINESS**

**Classroom Tardiness:** The faculty and students require timely arrival for class in order to avoid disruption. Unless notified beforehand, a student is considered tardy once the instructor has closed the door and begin lecturing. A student who is tardy must wait in the hall for the break to enter the classroom/skills lab, and time will be documented as absent. . See individual course syllabi for tardiness policy. Professional conduct is expected of students at all times.

## **Bainbridge College ADN Program Clinical Policies**

## CLINICAL ENVIRONMENT

For the required clinical component, students will work in varied patient care units. The majority of the time will be spent in private and semi-private patient care rooms. As a student nurse, one may possibly receive cuts from sharp instruments, infections from sharp instruments, infections from contaminated equipment and personnel. There also exists a potential exposure to communicable diseases. Following standard precautions in the clinical setting is mandatory; however, the chance of exposure to blood or other body fluids is high and a condition of enrollment.

## ESSENTIAL FUNCTIONS REQUIRED IN CLINICAL AND CLASSROOM

The role of student nurse holds certain physical demands. Much of the day may be spent standing and/or walking. The essential functions delineated below are necessary for nursing program admission, progression, and graduation. These functions are essential in order for safe and effective nursing care to be provided. Essential functions include, but are not limited to:

### 1) **Communication/Interpersonal Relationships**

- a. Establish and maintain effective and sensitive interpersonal relationships with clients, peers, families, groups, community representatives, members of the health care team and nursing faculty.
- b. Communicate therapeutically with all individuals
- c. Communicate ideas and concepts clearly and accurately
- d. Accurately and completely report and document information regarding client
- e. Promote and participate in client education based upon identified health needs
- f. Access and utilize information from multiple sources
- g. Work effectively both independently and in a group

### 2) **Cognitive/Critical Thinking**

- a. Utilize critical thinking skills in classroom and clinical learning activities
- b. Demonstrate ability to competently read, write, and understand the English language
- c. Demonstrate satisfactory performances on written examinations including drug calculation testing
- d. Formulate and implement safe and ethical decision making practices
- e. Satisfactorily achieves program outcomes

### 3) **Sensory Perception**

- a. Visual
  - i. Read fine print
    1. Computer
    2. Written Medical Record
    3. Medical Equipment
  - ii. Read print and cursive writing

- iii. Visually observe changes in client's physical condition
- iv. Observe changes in color, of assessment findings, of the client
- b. Auditory
  - i. Distinguish Medical alarms
  - ii. Differentiate sounds using a stethoscope
  - iii. Distinguishing sounds with or without a stethoscope
  - iv. To communicate effectively with others
- c. Tactile
  - i. Distinguish physical assessment findings (i.e. pulses, temperature, size, and other characteristics)
- d. Olfactory
  - i. Detect odors (i.e. body odor, wound drainage, and other odors in the environment)

#### **4) Motor Function**

- a. Possess both gross and fine motor skills to operate delicate equipment and/or handle small objects and provide safe nursing care to client
- b. Possess good eye/hand coordination
- c. Ability to move, position, transfer, turn, assist with lifting or lift and carry client without injury to patient, self, or others
- d. Ability to push/pull heavy objects (50 pounds minimally) without injury to client, self, or others
- e. Ability to stand on both legs and walk without an assistive device (i.e. walker, cane, crutches, etc.)
- f. Ability to freely move all joints
- g. Ability to stand, bend, walk, and/or sit for a minimum of 12 hours in the clinical setting while performing physical activities and not jeopardizing the safety of client, self, or others.
- h. Ability to move about in confining areas
- i. Ability to transport self and patient without utilizing electrical devices
- j. Ability to function with hands occupied with nursing care or carrying items
- k. Ability to perform CPR effectively
- l. Ability to utilize a computer as well as calibrate and operate equipment utilized in the provision of effective nursing care.

#### **5) Professional Behavior**

- a. Demonstrate a caring attitude which encompasses respect, empathy, cultural sensitivity and therapeutic communication at all times
- b. Perform competent, safe, effective nursing care for clients in all settings at the appropriate skill level and within guidelines of the ANA Code of Ethics
- c. Recognize and accept policies and procedures of Bainbridge College, the ADN Program, and clinical facilities as well as the consequences for failure to comply
- d. Recognize and accept the student honor code and code of conduct provisions and understand consequences for failure to comply with them

- e. Comply with requirements of the ADN Program for successful progression
- f. Comply with the requirements for the Georgia Board of Nursing for licensure
- g. Demonstrate responsible, accountable, ethical behavior at all times, seeking guidance from faculty when necessary

#### CERTIFICATION OR LICENSURES:

Students who hold or who have held a license or certification in the health care field must document this on the application process. Students who hold or have ever held an encumbered, limited, or disciplined license may not be eligible to enter or continue in the program.

**Unlicensed students shall be employed only as unlicensed nursing personnel. They shall not represent themselves, or practice, as nursing students except as part of a learning activity in a practice setting.**

#### Clinical Placement

Clinical facilities have the authority to prohibit any student from participating in clinical activities on their campus. If such a situation arises, the student will be advised of the facility's decision so that the student may potentially appeal the facility's decision. In the event that clinical sites cannot be secured, the student will be unable to complete the course requirements and will be withdrawn from the nursing program.

#### CLINICAL FACILITY STANDARDS

A variety of clinical agencies provide clinical experience for the Associated Degree Nursing Program. Students are notified each semester about the schedule and location of the clinical practicum. Students cannot request certain clinical locations and must attend the clinical sites as assigned.

1. It is the responsibility of the student to provide his/her own transportation to designated facilities.
2. A physical exam must be completed with current immunizations prior to starting the freshman clinical experience
3. Hepatitis B series vaccinations will be initiated at the time of the physical and must be completed. If student does not agree to accept the Hepatitis vaccinations series, he or she must sign the declination form. The Hepatitis vaccination is strongly recommended.
4. A skin test for tuberculosis or a chest x-ray will be completed as indicated. Failure to provide this evidence will result in exclusion from clinical sites and failure of the course

5. Personal health insurance coverage is required for each student. Proof of coverage must be verified each semester by faculty. The nursing profession carries an inherent risk of contact with persons with communicable diseases; in addition, there is also a risk of injury from sharp and/or contaminated objects. Bainbridge College does not have an infirmary or insurance that covers illness or injury of students in the clinical area. Refer to the Bainbridge College website ([www.bainbridge.edu](http://www.bainbridge.edu)) for information regarding student health insurance. Neither Bainbridge College nor clinical facilities assume responsibility for injury or illness of students. The student must assume responsibility for the cost of any care required.
6. All students are required to provide proof of current American Heart Association CPR certification (health care provider level infant, child and adult), and student liability insurance. Failure to provide this evidence will result in exclusion from clinical sites and the inability to progress in the ADN program. Students are expected to obtain CPR training on their own. CPR certification must remain active throughout entire program.
7. Smoking is **not** permitted during any clinical experience, including breaks. Violation will result in a clinical warning. A second offense can result in exclusion from the clinical area.
8. Students are not allowed to chew gum at any clinical facility/activity. This includes, but is not limited to, health fairs, clinical site rotations, pinning ceremony and graduation.
9. Students are not to make or receive personal telephone calls while in the clinical area except in extenuating circumstances and with instructor's approval. **No cell phones, pagers, or beepers are permitted in the clinical setting.**
10. If, in the clinical judgment of the instructor, possible evidence exists related to the intake of mind-altering substances, the instructor may remove the student from the clinical area. In addition, the student may be required to submit to drug testing at the student's expense. (see Reasonable Suspicion Drug Testing starting on pg 38 for more info)

## COLLEGE LABORATORY

The nursing laboratory augments classroom theory by teaching skills, which are necessary in the application of theory. The following instructional methods are utilized in the lab: demonstration, supervised practice, individual practice, independent viewing of slides, tapes, and film presentations, computerized instruction, and skills check-offs.

At the beginning of each semester, the nursing student will receive a list of skills to be completed during the semester and the time frame for completion of each skill.

## COLLEGE LAB ATTENDANCE

The nursing lab experience is a part of the clinical hours for which course credit is given. Students are required to attend all college nursing laboratory experiences and must follow professional clinical behaviors. The student is required to call the course lab instructor or coordinator to report an anticipated absence from an assigned lab experience. Students will be responsible for material and hours covered at the missed college laboratory, i.e., demonstration, supervised practice. **If a student is absent from a lab experience, THIS IS CONSIDERED AS A CLINICAL ABSENCE. The student must call the lab instructor/coordinator on the day of the absence within one hour of the start of the lab. Students with lab/clinical absences run the risk of not meeting clinical objectives, resulting in failure of the course.**

### College Nursing Lab Policy

#### I. Introduction

It is the intent of the faculty and administration in Allied Health and Nursing programs to provide a safe learning experience for all students and provide guidelines for the development, performance, and continuation of a complete safety program.

The following guidelines provide instructions in maintaining safety for students, staff, and faculty while using the clinical skills laboratory within Bainbridge College and will be adhered to by all concerned.

The Nursing Division Chair and Course Coordinators will update the contents of this manual annually. All students, staff, and faculty will be advised of these revisions.

Instructors are responsible for enforcing the regulations set forth in this manual.

#### II. General Guidelines

A. All faculty, staff, and students must know and practice the safety guidelines at all times while using the clinical skills lab. Failure to abide by general guidelines can result in disciplinary action. This manual will be available in the clinical lab and students will be instructed to review the contents upon admission to the clinical component of the program.

B. All labs are locked unless occupied by faculty and/or students during class or practice. Any break in security must be reported immediately to College Security Officer

C. Students should be knowledgeable of the care, handling, and proper use of equipment prior to using it in the laboratory.

D. Students should report pregnancies, physical limitations, recent injuries, illnesses, or surgeries, or communicable diseases to their instructors as soon as possible so that necessary precautions may be taken. A medical clearance from a physician is required before a student with physical injuries, illness, surgery, pregnancy, or who has a reported communicable disease will be allowed to practice or perform clinical check offs in the clinical skills lab.

E. It is the right of the instructor and/or clinical agency to determine whether a student in any of the situations above is capable of safely performing the required skills needed to provide competent nursing care.

### **III. Skills lab guidelines**

A. There shall be no eating, drinking or smoking in the labs during student use, demonstration or return demonstration.

B. At no time will exits be obstructed with furniture or other items.

C. All doors and cabinets shall remain closed and locked when not in actual use.

D. The skills lab will not be used as a health center for ill students, staff, or faculty.

E. Children or unauthorized personnel are not allowed access to the clinical skills lab at any time. Injury to unauthorized personnel in the lab will not be considered the responsibility of Bainbridge College

F. All students shall practice proper hand washing technique while utilizing skills lab.

G. Gloves are worn by students and faculty during any contact with body fluids. Gloves are utilized for practice and demonstration of skills. Gloves are utilized for personnel using harsh disinfectants to clean the lab. Bainbridge College will provide sterile and non-sterile gloves for faculty and students.

H. The clinical skills lab is not to be used as a social area.

I. Students should report any misconduct occurring in the skills or computer laboratories and may be held responsible if not reported.

J. Students are expected to come to lab prepared by having read the scheduled lab objectives and assignments prior to the start of the lab period.

K. Students are expected to dress conservatively in the laboratory with no low-cut tops and no short-shorts. Flip flops are not allowed in the lab, either.

L. Students are not to be in the lab without a faculty member present.

#### **IV. Skills Lab Safety**

##### **A. Medication /Fluid Administration**

1. Students will be instructed to practice and return demonstration of only those skills for which they have had prior instruction and gained knowledge with content and proper method. Students are expected to come to the laboratory prepared according to the prior instruction on the procedure.
2. Students should at all times practice safe techniques while learning in the skills lab. Standard precautions should be followed at all times.
3. When breaking ampules for practice, students should protect their fingers by using a gauze covering or an alcohol wipe and should break the ampule in the opposite direction of their face.
4. Needles are provided for practice of injections and are used only when instructors are present for assistance.
5. Students must demonstrate safety precautions while utilizing needles during practice as instructed in class. Any irresponsible use of needles will result in disciplinary action and possible clinical failure.
6. Students are to practice injections ONLY on the manikins provided in the skills lab.
7. Students **Are never to** recap needles and must discard used needles in the sharps disposal container provided in the skills lab.
8. I.V. fluids with expired dates may be used for practice and demonstration unless obviously contaminated. These fluids are NOT for internal use, but for practice with manikins only.
9. Any IV fluids and tubing which have been used will be discarded at the end of each semester.

##### **B. Electrical Safety**

1. Wet materials may not be used around electrical outlets or equipment.
2. Faculty and students are responsible for reporting any problems encountered with electrical equipment immediately to Plant Operations.
3. No electrical cords will be left in the pathway of walking traffic. Extension cords will be properly taped to the floor if utilized.
4. Electric hospital beds in the skills lab will be inspected as needed for repairs.
5. Electric beds shall be maintained in the lowest position.
6. Only three-prong plugs that contain a ground wire should be used to power equipment in the skills labs.

### **C. Physical Safety**

1. Students will be instructed in principles of body mechanics prior to practice and return demonstration of moving, lifting, and transferring skills.
2. Student should use caution when practicing lifting skills. If the student is unsure of the proper technique or is concerned regarding object weight, an instructor must be present and assistance obtained.
3. Students practicing lifting techniques will not perform these procedures in an unsafe manner. Bainbridge College will not be responsible for any injury incurred. Irresponsible student behavior can result in program dismissal.
4. Equipment needed for body mechanics practice will be kept in good working order. Any broken part will be reported immediately to the Instructor and Plant Operations
5. Equipment with wheels is to be locked during practice and return demonstration.

### **V. Clinical Lab Safety**

- A. The policies and procedures of specific clinical agencies will be adhered to by both faculty and students during the clinical experience.
- B. Each student will submit evidence of a health examination, required laboratory studies and vaccinations as required by Nursing and Allied Health Programs.

### **VI. Reporting of an injury**

- A. Any incident occurring in the skills, computer, or clinical labs during school hours must be reported to the instructor immediately.
- B. An incident report must be filled out for the injury. The report must be signed by the faculty member and the student involved as soon as possible after the incident.
- C. The individual will be referred to the appropriate health care agency if treatment is required.
- D. Protocol for a physical injury/occupational exposure:
  1. Report the incident to instructor and notify the Nursing Division Chair. Complete Student Accident/Incident Form

2. A faculty member will assess the student/staff and administer first aid as needed. The faculty/staff/student will be referred to the appropriate health care agency if treatment is required.
3. The appropriate Chair will notify the college risk manager and follow up with the student/faculty member within 2 working days. A copy of the incident report and a written follow up report will be kept in the office of the Nursing Division Chair.

If injury involves occupational exposure, refer to Exposure Control Plan. A Exposure Report Form must be completed.

## **VII. Cleaning of Laboratory and equipment**

- A. Instructors will be responsible for assisting college personnel in the disinfection and maintenance of equipment, and monitoring of the lab at all times.
- B. Students and faculty are responsible for the cleanliness of the lab during and after use.
- C. Floors, counters and furniture will be cleaned by appropriate college personnel as deemed necessary and at the end of each semester. Equipment located in the clinical skills lab will be cleaned as required and at the end of each semester with the appropriate cleaning agent.
- E. Linen on the beds will be changed when soiled, after extensive use, and at the end of each semester.
- F. Bedspreads may be used more than once during return demonstration of bathing.
- G. All soiled linen will be sent to the authorized vendor for cleaning.

## **VIII. Hazardous Waste Disposal**

Potential infectious wastes are collected, contained, stored, and disposed of according to the Occupational Safety and Health Administration (OSHA) guidelines.

- A. Any breakage of thermometers resulting in spillage of mercury will be handled by placing the mercury in a closed bottle while wearing gloves and then notifying the Hazardous Waste Office for proper disposal.
- B. Batteries used in skills lab equipment will be disposed of through the Hazardous Waste Office.

C. Biohazard contaminated supplies used during clinical or community promotion activities are collected in biohazard-labeled containers and transported to closest Bainbridge Memorial Hospital.

## **IX. Fire and Emergency**

Students and faculty should become familiar with the location of the nearest fire extinguishers and pull boxes for fire alarm.

### A. Fire – Remember RACE

1. Rescue those in the immediate area
2. Pull the Fire Alarm
3. Confine the fire
4. Extinguish or Evacuate. (If small enough to extinguish, or if not evacuate.)

(This is the policy at most hospitals and clinical facilities. While in the laboratory at BC, follow the professor's instructions or follow BC Emergency Response Manual policy.

Building diagrams that indicate fire escape routes and locations of fire escapes are located in the clinical laboratory.

### B. Emergency

Contact Security at 229-493-0554. Bainbridge College Security is available 24 hours a day, 7 days a week. When contacting security, say "This is an Emergency", proceed with details such as what has occurred and where the emergency is.

## **CLINICAL ATTENDANCE**

Student clinical experiences will be in a variety of settings and locations. Students are required to attend all clinical experiences. If an absence is unavoidable, do not call the ADN faculty offices. The student must call the assigned clinical unit *prior* to the beginning of the shift and leave a message for the instructor. The student must make note of the name of the person taking the message for later verification in the event the message is not delivered. All clinical absences must be made up before the last clinical day of the semester. All clinical hours must be made up. In certain cases, clinical make-up experiences may not be possible. **Students with clinical absences run the risk of not meeting clinical objectives, resulting in failure of the course.**

*Students are required to be in the clinical facilities ready for pre-conference 15 minutes prior to assigned shift (i.e. 6:45 am for 7 am to 3 pm shift) and ready to begin work at the assigned time. Tardiness of greater than 1 hour to laboratory/clinical will constitute an absence in clinical and or the nursing lab. If a student is repetitively tardy, defined as 5 – 59 minutes after assigned arrival time, disciplinary action will be taken.*

Clinical conferences are essential parts of the clinical experience, and professional behavior is expected during conferences. Students must be present and on time. Prior to leaving the clinical area, the student will complete all required documentation and give a report to the charge nurse and/or the nurse responsible for his/her client.

### **CLINICAL CLEARANCE FOR STUDENT PREGNANCY**

In the event a student is pregnant while enrolled in the ADN program, documentation must be submitted from the student's health care provider that states the student's health status will not be in jeopardy by enrollment in the program. Although the faculty will attempt to make clinical assignments to avoid potentially hazardous situations, it remains the student's responsibility to maintain her own well being and demonstrate responsible behavior with respect to her fetus. Bainbridge College assumes no responsibility for problems that may occur during pregnancy or delivery. Faculty will not limit how long the pregnant student may be enrolled provided it is understood that she is expected to meet the same standards of clinical and classroom performance as are all students enrolled in the ADN program.

### **CLINICAL ALERT/WARNING/TERMINATION POLICY**

Specific criteria for clinical performance are provided in individual course syllabi and evaluation tools. Student evaluation is a joint activity between the student and his/her clinical instructor to inform the student of his/her competencies or deficiencies.

**The safety of the client and the professional behavior of the student are essential.** A student may be given a clinical alert, clinical warning, or possibly terminated from the Nursing course and/or Program if the student's practice does not meet the criteria for the clinical experience.

The following are descriptions of clinical alert, clinical warning, and clinical termination:

#### **Clinical Evaluation Alert –**

This applies to any student who does not meet the *essential* criteria objectives (as defined on the clinical evaluation tool) at any time during the clinical experience. A clinical alert is written on the student's evaluation tool along with any recommendations for improvement. "Clinical Evaluation Alert" is at the instructor's discretion. **A student must follow up with the course coordinator within 24hrs if an alert has been received in clinical.**

### **Clinical Warning**

This applies to any student who receives an alert and fails to follow up on recommendations for improvement, resulting in unsafe or unprofessional practice. Students *may* also be placed on clinical warning *without* a prior “Clinical Evaluation Alert” if the situation is deemed a serious safety or professional issue by the course faculty. The student who is placed on “Clinical Warning” will receive a letter describing the incident/behavior along with required remediation. If a student does not satisfactorily complete the remediation process within the designated time frame, the student may be terminated from the course or the nursing program depending on the seriousness of the situation. A “Clinical Warning” may be initiated by a clinical instructor. A student must follow up with the course coordinator immediately following clinical a warning has been received in clinical.

### **Clinical Termination**

Any student who is placed on “Clinical Warning” and fails to satisfactorily complete remediation may receive a “Clinical Termination” which equals a clinical failure and a grade of “F” in the course. A student *may* also receive “Clinical Termination” from the program *without* a prior “Clinical Warning” or “Clinical Evaluation Alert” if the faculty believes that serious consequences to the student, clients, peers, or others may occur as a result of the student’s behavior. A student that is eliminated from the Nursing Program due to clinical termination is not eligible for readmission. “Clinical Termination” will be determined by an agreement of the entire full-time Nursing Faculty, and involved part time faculty, the Nursing Division` Chair, the Vice President of Academic Affairs and/or the College President.

### **DRUG/ALCOHOL TESTING POLICY**

The college is dedicated to maintaining a drug and alcohol-free workplace and academic environment; therefore, the use of illegal drugs and the unauthorized use of alcohol by members of the Bainbridge College community will not be tolerated. Accordingly, the College has adopted the Bainbridge College Policy on the Use of Illegal Drugs that requires students attending or participating in college activities to do so free from the presence of illegal drugs and/or the unlawful possession or use of alcohol.

All Bainbridge College students must become familiar with and comply with this college wide policy, which applies to behavior that occurs not only on the college campus, but also on property owned or controlled by the college and college supervised activities, such as nursing clinical. In addition, all students are subject to all applicable federal, state and local laws addressing illegal drug and alcohol use.

The Substance Abuse Policy and Drug/Alcohol Testing Policy, as described below, are intended to complement the College’ Drug-Free Campus and Work Place Policy.

## **1. Purpose of Substance Abuse and Drug/Alcohol Testing Policy**

To provide competent care, individuals must be in full control of their dexterity skills, mental faculties, and judgment. The presence or use of drugs or alcohol, lawful or otherwise, which interferes with critical thinking or motor coordination of nursing students, poses an unacceptable risk. Preventing and/or detecting substance abuse is critical in the nursing program. The Nursing program recognizes its responsibility to provide a safe, efficient learning environment for students and to fully cooperate with clinical agencies in providing safe and competent care to their clients. Therefore, this policy is designated to:

- 1) Prohibit abusing substances and/or activities or behaviors that are disallowed by the College's Drug-Free Campus and Work Place Policy
- 2) Identify students who may have a drug or alcohol-related impairment or conviction that may impact their ability to learn or provide safe nursing care practices or that may create intolerable risks for the college and clinical facilities.
- 3) Cooperate with clinical agencies in accordance with their policies, by requiring nursing students to consent voluntarily to a drug test
- 4) Disclose any drug testing results to appropriate Bainbridge officials.
- 5) Require all students enrolled in any allied health or nursing course to submit to mandatory drug testing based upon reasonable suspicion of substance abuse.

## **II. Policy Requirements**

### **A. Drug and Alcohol Exclusions and Duty to Notify of Drug/Alcohol Convictions**

1. Substance abuse as defined in this policy or a violation of any term of Bainbridge College policy while engaged in any clinical experience is strictly prohibited. All students enrolled in nursing courses or allied health programs are required to abide by these rules when reporting to nursing or allied health related courses, clinical experiences, and while at clinical facilities. Nursing or allied health students who violate these regulations will be unable to meet the essential qualifications/functions of the nursing or allied health curriculum and therefore may be ineligible to remain in the program of study.
2. At no time will students participate in courses or clinical activities while they are impaired.
3. Students who have violated the terms of this policy will be determined by appropriate Bainbridge College program officials and may be subject to a variety of academic-related sanctions, up to and including dismissal from the nursing or allied health programs of study.

4. A violation by any student of any state or federal statute, or regulation established pursuant to such statute, pertaining to the manufacture, improper possession, sale, use, or distribution of a drug or alcohol is strictly prohibited. A proven violation will result in student dismissal. A student who fails to notify the Nursing Division Chair within two days of an administrative action or legal conviction for any such violation will be subject to dismissal from the Nursing or allied health program.

#### **B. Required Disclosure of Drug Use/Non-Use for Students**

1. Whenever a student's academic or clinical performance is impaired, the college reserves the right to require the student to submit to drug testing.
2. Failure to reveal past legal convictions or providing false information in relation to activities associated with illegal or legally controlled substances or evidence that credibly establishes a past pattern of chemical substance abuse will be grounds for dismissal from the program.
3. For all clinical facilities which require students to be subject to the facilities drug/alcohol testing policies (including but not limited to pre-clinical placement testing or when there is reasonable suspicion to believe that a student may be impaired or is or has been engaged in substance abuse), the student may be tested in agreement with the affiliating agency policies.
4. Prior to being assigned to an affiliating clinical facility and as a precondition for placement at any clinical agency, the nursing student shall sign a consent: a) to abide by the drug/alcohol policies and drug testing policies of each clinical agency in which a student is assigned; b) to submit to any drug/alcohol testing required by the clinical agency; and c) to release a copy of any and all drug/alcohol test results to the Nursing Division Chair or other designated nursing official. Refusal to sign such consent shall result in inability to place the student in the clinical agency and may result in dismissal from the nursing program.
5. The cost of all drug/alcohol testing required by affiliating clinical agencies shall be borne by the student. Bainbridge College or any of its officers, faculty or staff shall not assume drug/alcohol testing costs arising out of any student placement at clinical facility.
6. A positive substance abuse screening test result shall be grounds for dismissal from the educational program as the student cannot meet clinical component course objectives. The Chair of the Technical Studies Division, and or Program Director will notify a student who has a positive drug test. If a student tests positive for a prescribed drug, the student must obtain a written letter from a qualified physician/practitioner stating that the drug level is within prescribed limits and that there is no indication of substance abuse. The physician must indicate that the drug will not hinder safe practice in the clinical area.

7. A student's failure to submit to a required drug screen, or attempting to tamper with, contaminate, or switch a sample will result in the student being dismissed from the nursing program due to inability to complete clinical course objectives.

### **III Reasonable Suspicion Drug Testing**

**1. Any student who demonstrates behavioral changes reasonably suspected to be related to substance abuse as defined herein will be subjected to testing on or off the college campus. A decision to drug test based on reasonable suspicion of substance abuse may be made by a faculty member and/or the clinical agency. The faculty member's request to drug test will be documented and may be based on a variety of factors, including but not limited to:**

- observable behaviors as direct observation of drug use and or physical symptoms or manifestations of being under the influence of a drug;
- erratic behavior, slurred speech, staggered gait, flushed face, dilated/pinpoint pupils, wide mood swings, or deterioration of work or academic performance;
- information that a student has caused or contributed to an accident that resulted in injury requiring treatment by a licensed health care professional;
- substance abuse-related conviction by a court, or being found guilty of a substance abuse-related offense in another administrative or quasi-legal proceeding.

The Drug Testing Procedure below will be followed if this mandatory reasonable suspicion drug testing is requested by college officials and faculty members:

- a) Drug tests will be arranged by Bainbridge College unless done in cooperation with the affiliating clinical agency. The cost of this drug testing will be borne by the student.
- b) Tests will be conducted by a qualified laboratory in accordance with established methods and procedures. Confidentiality of the student as well as the validity of the sample will be protected by the testing facility. The procedure for collection as determined by the collection site, will involve a witness to the voiding of the urine sample, securable urine containers, and chain of custody procedures that ensure that the samples identified to a nursing student actually contain materials from that student, that the samples are protected from tampering, and that the analysis of them is done in accordance with reasonable and accepted medical standards.
- c) The test shall screen for the presence of drugs whose use is either illegal, or which are prone to abuse (including alcohol), as determined at the discretion of the clinical facility or drug testing facility.
- d) Presumed positives will be confirmed by the best currently available techniques. If the test is positive, the sum of the available evidence, including health history, will be used to determine the presence or absence of substance abuse. Positive test results shall be documented in the student college records

e) The Nursing Division Chair will be notified of all test results, whether initiated or requested by the clinical agency or by the nursing/allied health program.

f) If the initial screening test is negative, that fact will be noted in the student record. Unless there is compelling evidence to do otherwise, the preliminary investigation will cease.

g) Dismissal from a program can result from the following: a) the student refuses to submit to drug testing based upon reasonable suspicion; or b) a student's drug testing results are positive for illegal substances, non-prescribed substances, or alcohol.

h) Licensed nursing students who refuse to submit to drug/alcohol testing based upon reasonable suspicion or who have positive drug test results will also be reported to the appropriate state board of nursing. Full reinstatement of licensure will be required for an unrestricted return to the educational program.

#### **IV. Confidentiality**

All drug testing results will be treated by Bainbridge College as information that is received in confidence and shall not be disclosed to third parties unless disclosure is required by law, the information is needed by appropriate school officials to perform their job functions, disclosure is needed to override public health and safety concerns, or the student has consented in writing to the release of the information. The College shall have the right to use and disclose the results of drug testing required by this policy in connection with internal academic purposes and in connection with the defense of any student grievance and any claims filed by a student, or by his/her personal representative, in any court of law or with any state or federal administrative agency.

#### **V. Procedures for Readmission after Positive Drug Test**

##### **A. Readmission Prerequisites**

A student who is dismissed from a program due to a positive drug test will be considered for readmission if the following conditions are met:

1. Submission of a verifiable letter from a recognized drug treatment agency stating that the student has successfully completed a substance abuse program.
2. Submission to a drug test prior to readmission. This drug test will be at the student's expense. A positive drug test will result in ineligibility for readmission.
3. Submission to drug tests as requested by the nursing program or clinical agencies after readmission.

## **B. Incidence of Reoccurrence after Readmission**

A student who is re-admitted to the clinical program, and thereafter tests positive for any drug/alcohol test or is otherwise determined to have engaged in substance abuse as defined herein, will be dismissed and will be ineligible to return.

## **C. Appeal Process**

A student may appeal the college's decision to dismiss or not re-admit a student through the established Grievance Procedure.

## **Clinical Uniforms**

The student uniforms must be purchased and worn as directed by faculty.

Male students will wear a white shirt or jacket and green trousers. Females will wear a uniform dress or appropriate uniform top with green pants or skirt. No cleavage should be exposed at any time. No "banded" pants or knit pants permitted. No shorts, Capri length pants, culottes or split skirts permitted. The dress must be knee length, and tops must be at least fingertip length. A school patch must be placed on the left sleeve of the uniform top of both male and female students. A lab coat with the school patch on the left sleeve may be worn with the uniform. Also included in the uniform are bandage scissors, a watch with a second hand, a penlight, a pen with black ink, and a nametag as dictated by the clinical site/college. White standard low top nursing shoes with closed heel and toe, white hose or socks (with pants only) for females and white socks for males are required. Athletic shoes are acceptable only if they are void of any color or large logo.

Uniforms and shoes must be clean and neat. Uniforms are not to be worn to class or to other activities prior to or after being worn in the clinical area. (Exceptions may be made in certain circumstances as approved by Nursing Faculty). Colored nail polish, acrylic nails or tips, excessive make-up, perfume, scented aftershave, or other offensive odors (including smoking odor) are not acceptable. Nails for both male and females must be kept short and clean at all times. A simple wedding band and one pair of small stud earrings may be worn while in uniform. Large earrings, loops or dangling earrings are not permitted. No necklaces that are visible outside the uniform are permitted. No other facial/oral jewelry is allowed. Bracelets (except medical alert) are not permitted. Body art or tattoos must be under clothing or concealed. Hair must be neat, clean and kept in a manner that does not violate medical asepsis with white or neutral hair clips and/or pins (no large or colored bows). **If you need clarification, consult an ADN faculty.**

Students must practice good body and oral hygiene. Deodorant must be utilized. Offensive odors will be discussed with the student.

Uniforms are to be worn for all off-campus clinical experiences unless otherwise instructed. Certain functions may necessitate wearing appropriate professional street clothing (khakis and polo shirt) with a white lab coat with school patch attached and

nametag. Appropriate professional street clothes do not include jeans, shorts, capris, floods, sneakers, sandals or other extremely casual wear.

Failure to wear the appropriate uniform will result in a clinical warning and the student may be sent home. A second offense may result in exclusion from the program. The student is required to maintain professional appearance at all clinical sites.

## **CLINICAL PROCEDURES**

The student should never perform a clinical skill/procedure if unsure of the procedure. When in doubt, the student should notify the clinical instructor/preceptor. It is not the responsibility of the doctors, nurses, or client to be familiar with the nursing student rules, regulations and policies. It is the student's responsibility to be knowledgeable of the rules, regulations and policies of the nursing program and abide by these. It is permissible at any point to call/page an instructor to request guidance, assistance, or permission to perform a skill/procedure. Students should never perform an invasive procedure for the first time without instructor permission. It is imperative for the nursing student to know limitations and accept responsibility for actions and to abide by the nursing program policies, rules and regulations. Failure to do so can result in suspension from the nursing program.

### **Level I Procedures**

These procedures may be performed without an instructor's **direct** supervision. However, if assistance is needed or questions arise, call an instructor for clarification.

1. Vital signs and basic physical assessment
2. Partial baths
3. Bed baths
4. Oral Hygiene for conscious client
5. Transfer ambulatory client in and out of bed
6. Hair care
7. Assisting patient to dress
8. Care of client's unit/room
9. Making unoccupied bed
10. Making occupied bed
11. Assist in feeding client with no swallowing difficulties
12. Serving diet trays (except isolation patient)
13. Ice and water to client
14. Hand washing
15. Obtain ambulatory client's weight and height
16. Turning and repositioning patient (except spinal injury, hip fracture, comatose patient unless assisted by licensed personnel)
17. Use of side rails
18. Cleaning/replacing supplies and equipment

## Level II Procedures

Permission and supervision by an instructor is required the *first time* the procedure/skill is performed by the student. If uncomfortable with a procedure/skill on subsequent performances, student may contact an instructor for assistance.

1. Collection of specimens—stool, urine, sputum, strep screen, etc.
2. Assisting a physician
3. Charting
4. Oral hygiene for comatose patient
5. Postmortem care -
6. Perineal care
7. Intake and Output
8. Range of Motion exercises
9. Making occupied bed for critical/seriously ill patient
10. Turning, moving, lifting, transfer of semi or non-ambulatory patient
11. Teaching crutch walking and or walker techniques
12. Comfort devices
13. K-pad use
14. Management of indwelling urinary catheter (not including insertions)
15. Management of any indwelling tubes
16. Finger stick glucose monitoring
17. Application of heat or cold
18. Pre-operative care
19. Post-operative care
20. Turn, cough, and deep breathing exercises
21. Incentive spirometry instructions
22. Pre-operative and Post-operative teaching
23. Care of patient with communicable disease
24. Care of patient valuables
25. Oral and Pharyngeal suctioning
26. Care of casts, traction or amputations
27. Physical Assessment
28. Removal of indwelling urinary catheter
29. Removal of IV catheter
30. Use of safety device or restraint
31. Ace bandage application
32. Binder application

### **Level III Procedures**

The student must always have instructor permission to perform a Level III procedure/skill unless otherwise instructed by the instructor. The student must call/page the instructor for ***permission*** to perform the procedure/skill **PRIOR** to performance. Additional requirements may need to be satisfied prior to performance of a Level III procedure.

1. Admission of patient to the unit
2. Transfer of patient
3. Discharge of patient
4. Enema (any type)
5. Catheterization
6. Dressing change (any type)
7. Discontinuation of any type of tube
8. Care of chest tube
9. Tracheotomy care
10. Irrigation of any type tube
11. Medication administration (oral, parenteral, rectal, vaginal, otic, optic, topical, sublingual, etc)
12. Colostomy care
13. Care of the burn patient
14. Tube feeding of any type -
15. NG tube insertion
16. Discontinuation/change of IV fluids
17. Removal of sutures or staples
18. Administration of IV medication
19. Changing IV fluid bag
20. Discontinuation of any special electrical apparatus
21. Oxygen administration
22. Venipuncture
23. CPR
24. Guaiac stool for blood -II
25. Tracheal suctioning
26. Use of patient lift

**Failure to secure permission or satisfy pre-performance criteria for any Level III procedures will result in disciplinary action and/or suspension from the nursing program depending on the severity of the action/potential consequence and adverse complications.**
